ORAJET® 1972X Digital Printing Polypropylene

The perfect solution for vividly coloured advertising prints.

With the new ORAJET® 1972X Digital Printing Polypropylene, advertising prints have never looked better. The material has been specifically designed for large format advertising prints, and when laminated with ORAFOL's special UV protective lamination film, your advertising poster will withstand outdoor weather conditions, and ensure that they keep looking great for even longer.

Recommended lamination film: ORAGUARD® 236.

Product benefits include:

- For water based digital prints (specially developed for high speed water based digital prints)
- Especially for large format prints
- Available in white
- Matt finish
- Removable, grey adhesive

Engineered to Perform Better™
