

# ORAJET® 3350

## Digital Printing Polyester

### When a metal look for digital printing is needed

The new ORAJET® 3350 is not only a great looking chrome or gold film; it is also digitally printable. This makes it the ideal choice for manufacturing of labels, name tags, technical identification labels and much more – especially where low volumes are required.

The material comes with a special clear top coat for printing. In addition, the gold version comes with double sided gold look enabling application also to clear surfaces where the label is seen from both sides.

### Product benefits include:

- Digital printing film
- Special clear top coat for printing
- Available as chrome or double sided gold

**Engineered to Perform Better™**
