

ORAJET® 3106SG Caravan Film

Increased possibilities for adding great looking designs to your caravan

In the past, it has been a challenge to decorate the side of caravans – especially with photographic images. Caravans typically have sides made from textured plastic, which can be very challenging for graphics films to properly adhere to.

With the new ORAJET® 3106SG Caravan Film this problem has been solved, so a world of new decorating possibilities has opened up.

ORAJET® 3106SG can be used on any "hard-to-stick" substrates such as low energy plastics and rough surfaces, and is especially recommended for long-term outdoor graphic applications and markings on caravans and car trailers.

Product benefits include:

- High performance PVC film
- Special satin-glossy surface
- Excellent for "hard-to-stick" substrates and rough or textured surfaces
- Inkjet printing with solvent based inks, UV- or Latex inks

Recommended Laminating Films:

- ORAGUARD® 297GF / 215
- ORAGUARD® 290 / 290F

Other films for this application type:

- ORACAL® 961G
- ORAJET® 3961G

Engineered to Perform Better™
